## Abstract

Please enter your draft abstract here.

**2012 ACM Subject Classification** Replace `ccsdsc` macro with valid one

**Keywords and phrases** Dummy keyword

**Category** Computer Science Track [DRAFT]

**Supplement Material** Links to supplementary materials submitted with abstract draft for review

**Funding** *John Q. Public:* (Optional) author-specific funding acknowledgements

*Joan R. Public:* [funding]

**Acknowledgements** I want to thank ...

## About the authors

Please fill in personal details about the authors of this abstract here.

## 1 General Guidelines - Please READ!! And remove this section when submitting

Please submit a file containing all the section above and none of the sections below (sections including this section should be removed). Sections below are from the original LIPIcs template, and are only provided as a reference for typesetting your submission.

## General requirements

You **MUST** submit a document including the following, and the following only:

- A non-empty title, and;
- Authors of the abstract, including institutional affiliations and contact addresses/email;
- ACM subject classifications (NOTE: This must be filled out **appropriately**; how you classify your abstract has an affect on our review process, e.g. selecting the most appropriate reviewer);
- An abstract section containing **NO less than 200 words in ENGLISH and NO more than 600 words in ENGLISH**;
- Proper acknowledgements, supplements (if any), and funding sources.

---

<sup>1</sup> Optional footnote, e.g. to mark corresponding author

As a general principle, please do not modify the editor-only macros or use third-party packages other than those provided with the lipics template. Should you have complicated drawings, please submit them as supplements in .eps or .pdf format, and include links/descriptions to them in the **supplements** section.

In addition, **abstracts formatted as not following our guidelines will not be reviewed.**

## 2 Typesetting instructions – Summary

LIPICs is a series of open access high-quality conference proceedings across all fields in informatics established in cooperation with Schloss Dagstuhl. In order to do justice to the high scientific quality of the conferences that publish their proceedings in the LIPICs series, which is ensured by the thorough review process of the respective events, we believe that LIPICs proceedings must have an attractive and consistent layout matching the standard of the series. Moreover, the quality of the metadata, the typesetting and the layout must also meet the requirements of other external parties such as indexing service, DOI registry, funding agencies, among others. The guidelines contained in this document serve as the baseline for the authors, editors, and the publisher to create documents that meet as many different requirements as possible.

Please comply with the following instructions when preparing your article for a LIPICs proceedings volume.

### Minimum requirements

- Use pdf<sub>l</sub>atex and an up-to-date L<sup>A</sup>T<sub>E</sub>X system.
- Use further L<sup>A</sup>T<sub>E</sub>X packages and custom made macros carefully and only if required.
- Use the provided sectioning macros: `\section`, `\subsection`, `\subsubsection`, `\paragraph`, `\paragraph*`, and `\subparagraph*`.
- Provide suitable graphics of at least 300dpi (preferably in PDF format).
- Use BibTeX and keep the standard style (`plainurl`) for the bibliography.
- Please try to keep the warnings log as small as possible. Avoid overfull `\hboxes` and any kind of warnings/errors with the referenced BibTeX entries.
- Use a spellchecker to correct typos.

### Mandatory metadata macros

Please set the values of the metadata macros carefully since the information parsed from these macros will be passed to publication servers, catalogues and search engines. Avoid placing macros inside the metadata macros. The following metadata macros/environments are mandatory:

- `\title` and, in case of long titles, `\titlerunning`.
  - `\author`, one for each author, even if two or more authors have the same affiliation.
  - `\authorrunning` and `\Copyright` (concatenated author names)
- The `\author` macros and the `\Copyright` macro should contain full author names (especially with regard to the first name), while `\authorrunning` should contain abbreviated first names.
- `\ccsdesc` (ACM classification, see <https://www.acm.org/publications/class-2012>).
  - `\keywords` (a comma-separated list of keywords).

- 79 ■ `\relatedversion` (if there is a related version, typically the “full version”); please make  
 80 sure to provide a persistent URL, e. g., at arXiv.  
 81 ■ `\begin{abstract}...\end{abstract}` .

## 82 Please do not ...

83 Generally speaking, please do not override the `lipics-v2019`-style defaults. To be more  
 84 specific, a short checklist also used by Dagstuhl Publishing during the final typesetting is  
 85 given below. In case of **non-compliance** with these rules Dagstuhl Publishing will remove  
 86 the corresponding parts of L<sup>A</sup>T<sub>E</sub>X code and **replace it with the `lipics-v2019` defaults**.  
 87 In serious cases, we may reject the L<sup>A</sup>T<sub>E</sub>X-source and expect the corresponding author to  
 88 revise the relevant parts.

- 89 ■ Do not use a different main font. (For example, the `times` package is forbidden.)
- 90 ■ Do not alter the spacing of the `lipics-v2019.cls` style file.
- 91 ■ Do not use `enumitem` and `paralist`. (The `enumerate` package is preloaded, so you can  
 92 use `\begin{enumerate}[(a)]` or the like.)
- 93 ■ Do not use “self-made” sectioning commands (e. g., `\noindent{\bf My Paragraph}`).
- 94 ■ Do not hide large text blocks using comments or `\iffalse ... \fi` constructions.
- 95 ■ Do not use conditional structures to include/exclude content. Instead, please provide  
 96 only the content that should be published – in one file – and nothing else.
- 97 ■ Do not wrap figures and tables with text. In particular, the package `wrapfig` is not  
 98 supported.
- 99 ■ Do not change the bibliography style. In particular, do not use author-year citations.  
 100 (The `natbib` package is not supported.)

101 This is only a summary containing the most relevant details. Please read the complete  
 102 document “LIPICs: Instructions for Authors and the `lipics-v2019` Class” for all details and  
 103 don’t hesitate to contact Dagstuhl Publishing (<mailto:publishing@dagstuhl.de>) in case  
 104 of questions or comments: [http://drops.dagstuhl.de/styles/lipics-v2019/  
 105 lipics-v2019-authors/lipics-v2019-authors-guidelines.pdf](http://drops.dagstuhl.de/styles/lipics-v2019/lipics-v2019-authors/lipics-v2019-authors-guidelines.pdf)
